Application/Control Number: 09/667,689 Page 2

Art Unit: 2173

Allowable Subject Matter

- 1. Claims 1, 3, 4, 6-11, 19, 21-22, 24-31, 33-38, 40-46, 49, 51, 53, 55-59, 62, 64 and 66 are allowed.
- 2. The following is an examiner's statement of reasons for allowance: The present invention is directed to the design and optimization of communications systems using comparisons of predicted performance metrics and desired performance metrics in a computerized model of an environment. Each independent claim identifies the distinct feature of comparing under computer control the predicted performance metric to the desired performance metric, wherein the steps of specifying components or specifying locations is performed automatically, by computer control, multiple times until a desired comparison result is obtained. The closest prior art, "SMT Plus 1.0 User's Manual", authored by Skidmore et al. teaches an interactive tool that allows users to create and modify a computerized floor plan of an environment via specification of components and locations. The prior art fails to teach the computer automatically specifies components and locations successively until a comparison of the predicted performance metric to the desired performance metric produces the desired results, and thus fails to anticipate or render the above limitations obvious.
- 3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ting Zhou whose telephone number is (571) 272-4058. The examiner can normally be reached on Monday - Friday 7:00 am - 4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Cabeca can be reached at (571) 272-4048. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
